

Get your products to market faster with industry leading data

If you're building solutions for power markets, Yes Energy® can help

The energy transition is driving rapid change to the power grid and power markets.

The solutions you're building will be critical in helping the industry answer each new challenge as it arises. Comprehensive, timely, accurate data is foundational in any solution, but collecting, managing, and analyzing power market data is complex and costly.

Powered by Yes Energy is the answer.

By delivering reliable turnkey solutions for historic and current power market data, Powered by Yes Energy accelerates your time to market and reduces your development costs and operational risks.

Data scientists spend 60% of their time on cleaning and organizing data

Collecting data sets comes in second at 19%, meaning data scientists spend around 80% of their time on preparing and managing data for analysis. - Forbes Media

Task your critical resources with higher value projects by building your solution on top of Yes Energy's experienced data teams, time tested processes, and analytics-ready data.

Advantages of building your solution with Powered by Yes Energy

Expertise

Yes Energy is solely focused on nodal power markets and has been the industry's leading expert and data provider for 15 years.

Quality

"We chose to partner with Yes Energy because we realized that best in class forecasts require best in class data."

- [Enertel AI](#)

Reliability

Dependable data flow is mission critical and Yes Energy works around the clock to minimize your risk and cost from downtime.

Cost

Our turnkey solutions accelerate your time to value and free up your data specialists to focus on high value initiatives.

Technology

Our modern data pipelines (cloud, API, and data lake) seamlessly integrate and scale with your products and services.

Trust

Over 300 customers rely on Yes Energy to navigate the most complex, data-driven commodity markets in the world.
