YES ENERGY®

GridSite™

GRIDSITE™

Uncover Profitable Siting Opportunities with Confidence

Yes Energy has spent over 15 years building the energy sector's most trusted power market data infrastructure. GridSite draws from this proven foundation, including:

- 100,000+ nodal price points with full historical and forward-looking data

- 3 billion+ rows of power transactions, mapped to thousands of plants

- 50,000 generation, 55,000 transmission, and 6,000 load center projects tracked from 2,000+ sources, maintained by a team of expert analysts

- Frequent, automated ingestion of ISO queue data and public filings, cross-validated by human review

GridSite™ is a strategic planning tool purpose-built for energy asset developers evaluating renewable, thermal, storage, or data center projects. It delivers the market intelligence needed to evaluate, compare, and prioritize siting options, powered by the most comprehensive, high-integrity dataset in the industry. In today's rapidly evolving grid, project viability hinges not just on resource potential, but on understanding long-term price signals, congestion risk, and future infrastructure developments.

GridSite equips you to quantify merchant risk across siting locations, compare nodal revenue potential across all ISO regions, benchmark your project's outlook against operating peers, and track how upcoming grid changes may impact long-term value. Every dataset in GridSite is curated, vetted, and aligned to support decision-grade analysis, so you can move confidently from siting to execution with a clear understanding of risk and opportunity.

VISUAL ANALYTICS THAT STREAMLINE YOUR WORKFLOW

GridSite makes complex market data intuitive and actionable. It eliminates the need for manual data collection and calculations by providing interactive maps and charts that help you:

- Visualize historic congestion, LMP, and volatility trends by location

- Drill into pricing drivers such as load growth, generation mix, or curtailment risk

- Benchmark pricing and offtake structures of similar operating assets

- Explore queue congestion and upcoming infrastructure buildouts at a glance

- Access a long term bankable hourly level hub and nodal LMP forecast out to 2050

Purpose-built to help you make profitable siting decisions with the rigor and transparency energy development demands- all in one platform.

ABOUT YES ENERGY®

Yes Energy is how traders, power companies, and asset managers and developers can finally make sense of the complex, rapidly changing power market.

Supported by best-in-industry customer support, you get up-to-date data, comprehensive tools, and a specialized partner to help you make the right decisions every day.

It's time to Win the Day Ahead™ and only Yes Energy brings you the unique combination of better data, better delivery, and better direction you need to do that.

★ ★ ★ ★ ★

"Since integrating GridSite into my workflow, my approach to generation asset valuation has completely transformed. By consolidating critical datasets from multiple sources into one user-friendly platform, GridSite has drastically reduced the time I spend gathering and processing information. The clarity, accuracy, and finger-tip availability of power market data empowers me to deliver more robust, actionable insights to my clients by bridging the gap between pre-development and operational revenue expectations. As a result, our asset valuations are more resilient to market changes and are grounded in a deeper understanding of both current market conditions and future drivers of value and risk. With GridSite, I have a trusted ally in navigating the ever evolving complexities of today's power markets."
